

## WHAT WE DO

### Financial Support

We provide small emergency grants to patients referred by a social worker. Patient needs often include:

- Medication • Housing
- Child-Care • Utilities
- Insurance • Relocation costs
- Transportation

Costs associated with transplantation can threaten even those of moderate means.

### Newsletter & Website

We publish a newsletter with articles of interest to patients, caregivers and families. We also have a website with links to many other sites of interest to our patients. [www.HopeChestNews.org](http://www.HopeChestNews.org).

### Mentoring Program

Our mentoring program pairs transplant recipients with new transplant candidates. Our mentors are available to answer questions and provide support on an individual basis.

## WHO WE ARE

Our organization consists primarily of lung transplant recipients or candidates at the U of M Transplant Center and their family members.

Our underlying diseases are many, but we are united by a diagnosis of end-stage organ failure requiring a life-saving transplant.

## HOW WE STARTED

Hope Chest News began as a group that aimed to educate transplant patients through a quarterly newsletter. We soon recognized that patients' needs went beyond information. In December 2003, we formally registered as a 501(c)(3) non-profit organization and expanded our mission to include emergency grants and mentoring.

## MISSION STATEMENT

To support and educate U of M Health Medical Center patients and their families through the process of lung transplantation and to promote public awareness of the needs of these patients.

*"I am writing in support of Hope Chest News (HCN) and to stress to you how important this organization is to my patients and families. If you can support the organization in anyway, please do so. The annual golf tournament is their biggest fund raiser. If you can golf, great! If you have friends who golf, get them involved. If you can find it in yourself to give a monetary donation of any amount – it will help. Please help keep this vital organization going! The lung transplant patients and families at the U of M depend on it."*
